

VORTEX

VORTEX™ SERVICE AND MAINTENANCE OPTIONS

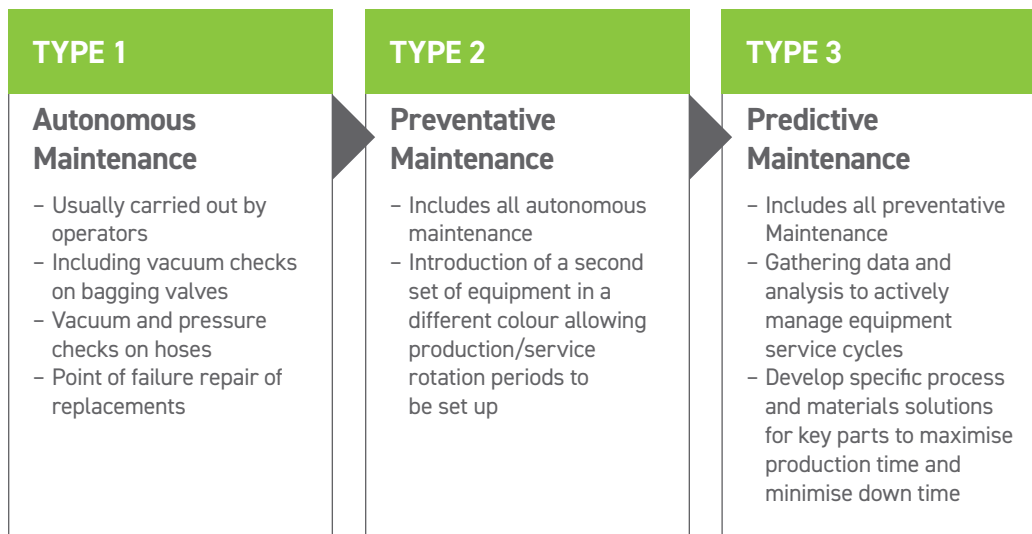

VORTEX™ SERVICE AND MAINTENANCE OPTIONS

Vortex™ products are designed to be maintained.

The Vortex™ range is produced entirely in stainless steel to provide consistent performance, high durability and long life to support long term maintenance and serviceability

Maintenance is often carried out on a reactive basis. Vortex™ products support TPM processes which can enable Preventative or Predictive Maintenance plans to be put into place to increase production control and maximise efficiencies.

Maintenance Types

Maintenance Options

- All Vortex™ Couplings are fully serviceable and easy to maintain, a full range of Vortex™ seal kits and spare parts are available from stock
- Maintenance can be carried in house by operators or maintenance staff, we offer full training support including step by step guides and video tutorials
- Maintenance support options including:
 - Service and Repair on a job by job basis
 - Onsite Service and Repair
 - Service and Repair contracts
 - Full inventory management
 - Bespoke maintenance solutions
